

Lower your telecom costs - improve your bottom line

Telecommunications is a major expense management category with significant cost reduction opportunities for most organizations:

- Outdated technology with unnecessary services that are no longer used.
- Billing errors from Move, Add, Change, Disconnect (MACD) activity and other factors.
- Invoice volume and complexity across multiple carriers and locations.
- Inadequate matching of services and plans to current needs.
- Poor carrier contract negotiation, terms and compliance.

TELECOM EXPENSE MANAGEMENT SERVICES

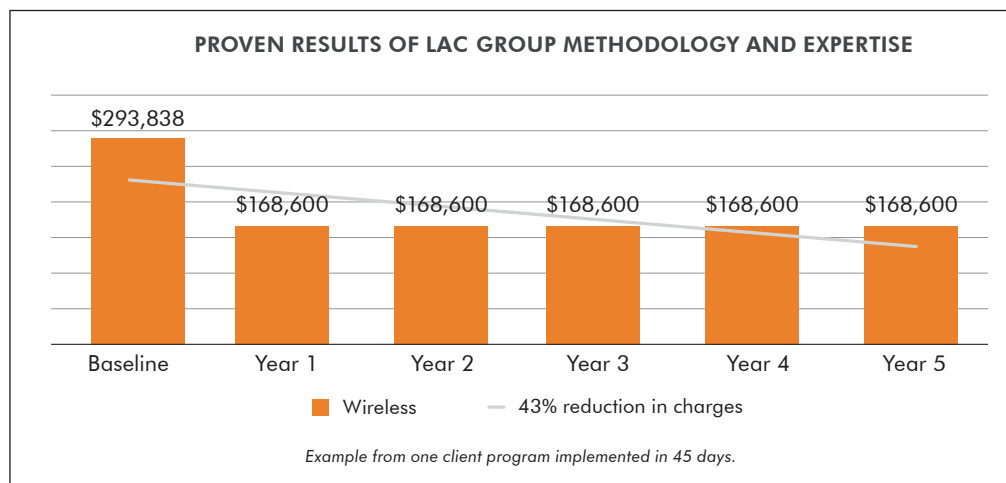

LAC Group will analyze your current telecom infrastructure and create a detailed optimization plan to reach your spend management objectives. With carrier independence and up-to-date knowledge of products and service offerings from vendors worldwide, we offer advice and support for technical considerations, pricing, project management, contract negotiation, service planning and business case construction.

RECOVER HISTORICAL OVERBILLING: Odds are 50/50 that your business is entitled to a substantial refund due to overbillings and errors. We work hard to recoup that lost money.

TELECOM RATE REVIEW: Our expert audits of telecom invoices against contracts, tariffs and inventories can spot incorrect contract implementation, missing discounts and other errors.

WIRELESS SERVICE REVIEW: Most businesses are paying at least 20% more than necessary. We shine a light into the dark corners of rate plans, fees and possible misuse to keep your wireless costs under control.

OPTIMIZATION ANALYSIS: Benchmarking your rates against industry and market standards, we can obtain more competitive pricing, with common monthly savings of 20% to 35%.

Our initial assessment will give you the information you need to make an informed decision to work with us. [Contact us](#) for a with no obligation consultation.
