

Uncover an optimal portfolio of print and copier equipment with CCM custom solution

## CORPORATION PRINTING & COPYING

Most organizations have a large number of different types of devices (personal printers, network printers, MFDs and copy machines) located across various networks and non-network locations.

**A decentralized system results in:**

- High control costs due to various types and amount of total equipment portfolio
- No volume or inventory control
- Overloaded IT departments
- No asset management strategy in place

COVID-19 presents an opportunity to evaluate and leverage new usage trends and future plans and match it with the best market offerings to achieve maximum values

## FREE UP CASH FLOW WITH CHASE COST MANAGEMENT

CCM will analyze all of your print and copier equipment, utilization and corresponding costs to create a new custom solution with standardized types of devices

## BENEFITS OF CCM SOLUTION

- Reduced costs on printer, copier, toner and IT support expenses
- Operational efficiencies with centralized controls and fully managed solution
- 24/7 performance monitoring and quarterly audits
- Unburdened IT infrastructure
- Remote access to toner and printer data
- Easy decision-making process around purchasing
